

## CA-N Assignment-2

Real-world applications of parallel computing:

Application:- Weather forecasting

Parallel computing use:

- Speed up image reconstruction & analysis by processing multiple image slices simultaneously.
- Uses multiple processors / cores for faster diagnosis.

Network system use:

- Connects diagnostic machines with hospital server and doctors.
- Enables real-time sharing of reports, images and remote consultations.

Importance

- Ensures quick, accurate and life saving diagnosis.
- Provide faster access to patient data & AI based analysis.
