

SDLC Task-1

Objective: Create a simple use-case diagram for a library management system.

A library management system is a software that helps manage the daily activities in a library, like issuing books and managing members.

There are two main actors in this system

- Librarian - Manages book check-out
- Member - Borrows and returns book.

Main use cases include :-

- check out book - Done by both librarian and member.
- Return book - Performed by the member.
